EXPERIENCE SUMMARY

- .NET Framework/Core experience using C# in Visual Studio to build, for example, a live presentation layer for customers to see their marketing campaigns before publishing them live to the webapp.
- JavaScript full stack experience wiring together UX with NoSQL database using Node.js and the Express/Mongoose frameworks.

EXPERIENCE

JayeFive GameDev, Portland, OR — *Game Developer/Founder*

JULY 2018 - PRESENT

C# scripting in the Unity Engine reverse engineering a mobile game named Missiles!. I recruited an artist to develop an art layer to lay on top of new game mechanics. Actively planning towards publishing by next summer.

Prosper IT Consulting, Portland, OR — *Intern*

MAY 2018

Two week sprint working on a piece of online marketing software. I was tasked with implementing an MVVM pattern using knockout.js within the MVC architecture.

TarBoush Lebanese Bistro, Portland, OR — *Server*

FEBRUARY 2018 - PRESENT

Hip Hawthorne restaurant where I get to work on soft skills at night, and leaves me the space to develop during the day.

J. Olson Contracting, Whitefish, MT — *Owner*

MAY 2013 - DECEMBER 2017

Carpentry business that began as a two man team while I was learning to use a saw. We grew the business into an eight man team and my personal networking at the lumber yard and endless nights of studying material costs and building techniques helped us to nearly double our income by the second year.

SKILLS SUMMARY

Language: C#, JavaScript, HTML, CSS

Framework: .NET, Express, Mongoose

Library: Node.js, knockout.js

Database: SQL, MongoDB

PROJECTS

Center for Diabetes Excellence, Monroe, CT — *Freelance Web Design*

Bootstrap front-end, Google Maps API and phpmailer. Mobile first design.

<https://www.cde-ct.com>

Yelp Camp Clone — *Full-Stack project*

Mock up of Yelp, but for campsites. User auth and persistent data.

EDUCATION

Tech Academy, Portland, OR — *Full Stack Dev Cert*

DECEMBER 2017 - MAY 2018

Learned computer fundamentals, git, SQL, coding in several web-based languages and during my internship took the lead on building a form entry preview using the MVVM pattern with knockout.js, a language not taught there.

U. of North Dakota, Grand Forks, ND — *B.S. Air Traffic Control*

SEPTEMBER 2004 - DECEMBER 2008

Learned the rare art of pushing tin. I was the first student in nearly a decade to achieve a 4.0 in the practical class hierarchy. Designed and implemented simulation scenarios still used today by the FAA training academy.
